PROFESSIONAL SUMMARY

Detail-oriented and results-driven Full Stack Developer with hands-on experience designing, building, and deploying responsive web applications utilizing the MERN stack, along with practical exposure to AI/ML and Generative AI integrations. Proficient in engineering scalable backend architectures, designing secure RESTful APIs with robust authentication, integrating LLM-powered features, and managing state across complex frontend frameworks. Adept at leveraging modern tools, version control, and cloud deployment platforms to deliver seamless, performance-optimized user experiences.

TECHNICAL SKILLS

Frontend Development: JavaScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Context API

Backend Development: Node.js, Express.js, Java, RESTful APIs, Authentication & Authorization, Postman

AI/ML & GenAI: Python, Machine Learning, Natural Language Processing (NLP), LLM Integration (Groq API), Generative AI, Prompt Engineering, Conversational AI Agents

Database Management: MongoDB, Mongoose ODM

Deployment & Tools: Git, GitHub, Vercel, Netlify, npm, VS Code

UI/UX Animation: GSAP, ScrollTrigger, Lenis, Locomotive.js

PROJECTS

AI-Powered Conversational Assistant Agent

MERN Stack & GenAI

- Engineered a full-stack AI-driven conversational assistant by integrating the Groq LLM API with a robust MERN stack architecture to handle intelligent agent workflows.
- Implemented context-aware conversational memory utilizing MongoDB to track and maintain multi-turn user interactions seamlessly.
- Designed and developed a highly responsive, dynamic chat UI featuring markdown rendering and real-time interaction capabilities using React.js and Tailwind CSS.
- Architected a scalable backend system built to support third-party API/tool integrations and secure data processing.

Technologies Used: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, REST APIs, Groq API, JavaScript

Task Manager

Frontend & State Management

- Developed a responsive task management web application enabling users to create, delete, organize, and manage daily workflows efficiently.
- Optimized application state management by leveraging React Hooks and implemented complex conditional rendering to deliver a highly dynamic, smooth user interface.
- Successfully deployed the production-ready application to Vercel, ensuring high availability and fast load times.

Technologies Used: React.js, Next.js, Tailwind CSS, Vercel

Sentiment Analysis of Bad Comments

AI/ML & NLP

- Built and trained a sentiment analysis model utilizing Natural Language Processing (NLP) techniques to accurately detect and classify negative comments within text datasets.
- Leveraged Python and core machine learning libraries to preprocess text data, engineer features, and optimize model classification accuracy.

Technologies Used: Python, Machine Learning, NLP

EDUCATION

Graphic Era Hill University

Dehradun, Uttarakhand | 2025

Master of Computer Applications (MCA)

Himalayan Institute of Technology

Dehradun, Uttarakhand | 2023

Bachelor of Computer Applications (BCA)
